- Premium US dollar interest rate calculated daily and paid monthly
- Low minimum balances or lock-up periods
- Daily liquidity

### HIGH INTEREST U.S. DOLLAR SAVINGS ANYTIME YOU NEED IT

Often during a person's investing lifecycle, he or she will need to "park" some money in a safe haven. This could be to hold money for a specific use in the not-too-distant future, to manage the timing of the deployment of capital, to wait out periods of uncertainty or volatility, or to simply take some risk off the table. Over the last five years, there has been an increased appetite for simple and safe investments.

When an investor has the need for a very safe and short-term liquid investment vehicle for U.S. dollar balances, the options available are relatively limited. This is especially true if the investor is dealing in smaller amounts. Finding a reasonable return in an investment product that minimizes risk adds an additional challenge. U.S. dollar high yield cash funds are the ideal solution.

**The Purpose US Cash ETF targets a better rate of interest than traditional U.S. dollar money market funds, while offering the safety and security of a savings account.**
