HOW RISKY IS IT?

The value of the ETF can go down as well as up. You could lose money.

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETFs with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

RISK RATING

Purpose Investments Inc. has rated the volatility of this ETF as **low to medium**.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the sections entitled "What are the risks of investing in the fund?" and "Who should invest in this fund?" in the ETF's simplified prospectus.

NO GUARANTEES

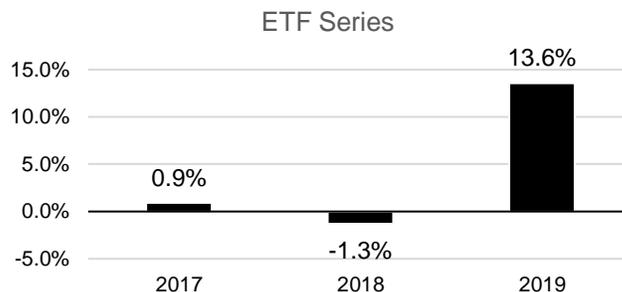

ETFs do not have any guarantees. You may not get back the amount of money you invest.

HOW HAS THE ETF PERFORMED?

This section tells you how the shares of the ETF have performed over the past year. Returns are calculated using the ETF's net asset value (NAV) after expenses have been deducted. These expenses reduce the ETF's return.

YEAR-BY-YEAR RETURNS

This chart shows how shares of the ETF performed in each of the past 3 years. The ETF dropped in value in 1 of the past 3 years. The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

BEST AND WORST 3-MONTH RETURNS

This table shows the best and worst returns for the shares of the ETF in a 3-month period over the past 3 years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	8.66%	March 29, 2019	Your investment would rise to \$1,086.64
Worst return	-3.53%	December 31, 2018	Your investment would drop to \$964.67

AVERAGE RETURN

A person who invested \$1,000 in ETF shares of the Fund since inception would have \$1,164.11 as at April 30, 2020. This works out to an annual compound return of 5.29%.

TRADING ETFS

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

PRICING

ETFs have two sets of prices: market price and net asset value (NAV).

MARKET PRICE

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand and changes in the value of an ETF's investments can affect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: bid and ask.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF shares. The ask is the lowest price a seller is willing to accept if you want to buy ETF shares. The difference between the two is called the "bid-ask spread".

- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

NET ASSET VALUE (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

ORDERS

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell shares at the current market price. A limit order lets you set the price at which you are willing to buy or sell shares.

TIMING

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

WHO IS THIS ETF FOR?

Investors who:

- want exposure to global equity and fixed income securities by using a tactical investment approach to North American listed ETFs;
- want distributions payable to them annually;
- are investing for the medium and/or long term; and
- have a low to medium risk tolerance.

Don't buy this ETF if you need a steady source of income from your investment.

A WORD ABOUT TAX

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan such as a Registered Retirement Savings Plan, or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

HOW MUCH DOES IT COST?

This section shows the fees and expenses you could pay to buy, own and sell ETF shares of the ETF. Fees and expenses — including trailing commissions — can vary among ETFs. Higher commissions can influence

representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. BROKERAGE COMMISSIONS

You may have to pay a commission every time you buy and sell ETF shares of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF EXPENSES

You do not pay these expenses directly. They affect you because they reduce the ETF's returns for the ETF shares.

As of December 31, 2019, the ETF's expenses were 0.94% of its value. This equals \$9.40 for every \$1,000 invested.

	Annual rate (as a % of the ETF's value)
Management expense ratio (MER)	0.94%
This is the total of the ETF's management fee and operating expenses. The manager waived some of the ETF's expenses. If it had not done so, the MER would have been higher.	
Trading expense ratio (TER)	0.00%
These are the ETF's trading costs.	
ETF Expenses	0.94%

TRAILING COMMISSIONS

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF doesn't have a trailing commission.

HOW RISKY IS IT?

The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund’s returns change over time. This is called “volatility”.

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

RISK RATING

Purpose Investments Inc. has rated the volatility of the Fund as **low to medium**.

Because this is a new fund, the risk rating is only an estimate by Purpose Investments Inc. Generally, the rating is based on how much the Fund’s returns have changed from year to year. It doesn’t tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund’s returns, see the “What are

the Risks of Investing in the Fund?” and “Who Should Invest In This Fund?” sections of the Fund’s simplified prospectus.

NO GUARANTEES

Like most mutual funds, this Fund doesn’t have any guarantees. You may not get back the amount of money you invest.

A WORD ABOUT TAX

In general, you’ll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

HOW MUCH DOES IT COST?

The following tables show the fees and expenses you could pay to buy, own and sell Series I shares of the Fund. The fees and expenses, including any commissions, can vary among series of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

1. SALES CHARGES

You do not pay a sales charge when you buy, redeem or switch your shares.

2. FUND EXPENSES

You don’t pay these expenses directly. They affect you because they reduce the Fund’s returns. The Fund’s expenses are made up of the management fee, operating expenses and trading costs. The series’ annual management fee is a negotiated management fee payable directly to Purpose of up to 1.00% per annum of the series value. Because no Series I of the Fund have ever been issued, its operating expenses and trading costs are not yet available.

More About the Trailing Commission

The Fund does not pay a trailing commission to your representative.

3. OTHER FEES

You may have to pay other fees when you buy, hold, sell or switch shares of the Fund.
